

2) $z^3 = 8e^{i\frac{\pi}{3}}$, avec $z \in \mathbb{C}$

Soit E module des racines:

$$E = \sqrt[3]{|8e^{i\frac{\pi}{3}}|} = \sqrt[3]{8} = 2$$

Donc: $k \in \{0, 1, 2\}$

$$\sigma_0 = \frac{\frac{\pi}{3}}{3} + 0 = \frac{\pi}{9}$$

$$\sigma_1 = \frac{\frac{\pi}{3}}{3} + \frac{2\pi}{3} = \frac{7\pi}{9}$$

$$\sigma_2 = \frac{\frac{\pi}{3}}{3} + \frac{4\pi}{3} = \frac{13\pi}{9}$$

Donc: $S = \{z_0, z_1, z_2\}$

$$= \left\{ 2e^{i\frac{\pi}{9}}, 2e^{i\frac{7\pi}{9}}, 2e^{i\frac{13\pi}{9}} \right\}$$

3)
